Meenakshi Bhati

Software Engineer(UI Developer)

I am seeking to work in a challenging and competitive environment, where I can contribute my knowledge and skills. I aspire to be part of a dynamic team in a progressive organization that encourages innovation and growth, allowing me to work towards both corporate and personal development goals

Experience

MAY 2021 - Present

Maxxton India Technologies Pvt Lmt. Pune

Technology Engineer - UI

Maxxton is a provider of integrated software solutions tailored for the hospitality industry, specializing in ERP software designed for holiday resorts and lodging companies. As a product-based company, Maxxton offers a range of products, and I primarily worked on the Web Manager (MCMS), an in-house CMS solution. Maxxton's platform optimizes park and campsite operations, driving occupancy and revenue growth.

Roles and Responsibilities:

- Frontend Development: Design, develop, and enhance the UI components of Maxxton's in-house MCMS (Web Manager) using ReactJS.
- Module Development: Create new modules for the Web Manager CMS, ensuring they meet business and customer needs.
- Enhancement of Existing Modules: Improve the functionality and user experience of existing components and modules.
- Collaboration: Work closely with the product and backend teams to ensure seamless integration of UI features with backend functionalities.
- Optimization: Enhance the performance and scalability of the system to accommodate the growth of hospitality operations.
- UI Ownership: Manage the full frontend development lifecycle, from ideation to implementation, for new features and modules in the system.
- Occasionally managed release trains using jenkins.

NOVEMBER 2020 – MAY 2021

Miraj Group, Udaipur

Software Engineer (UI Developer)

1. Right Man Apparel

- Developed a responsive web page for a men's fashion company
- Tech: HTML5, SCSS, jQuery, Wow Animation, Bootstrap.
